

CHANITHU SENVIDU MIDIGASPE

UNDERGRADUATE

CONTACT

- +94 74 278 6530
- senviduchanithu89@gmail.com
- [Chanithu Senvidu](#)
- [Chanithu Senvidu](#)
- Malabe, Colombo

SKILLS

- Programming Languages:**
Java, Python, JavaScript, HTML, CSS
- Frameworks & Technologies:**
Spring Boot, JAX-RS, Angular, React JS, Flutter, REST APIs
- Databases:** MySQL, H2, Postgres
- Tools:** Postman, Git, MS Office
- Soft Skills:** Time Management, Critical Thinking, Leadership, Teamwork, Communication

LANGUAGES

- English
- Sinhala

PROFILE

- Motivated Computer Science undergraduate at the Informatics Institute of Technology with a strong interest in backend development, algorithms, and data structures. Solid foundation in programming and software engineering, with a continuous drive to learn and contribute to impactful, technology-driven solutions.

PROJECTS

- Project OCEAN**
Group Project | 2023 September - 2023 December
 - Collaborated with a university group to develop Ocean, a website aimed at water
 - Technologies used : HTML, CSS, JAVA-SCRIPT
- Real-Time Event Ticketing System with Advanced Producer-Consumer Implementation**
Individual project | 2024 November - 2024 December
 - Implemented a real-time ticketing system to manage and track ticket sales efficiently.
 - Technology Used : SPRINGBOOT, Java
- Hope Bridge**
Group Project | 2024 November - 2025 March
 - Developed a donation platform using **Flutter and Spring Boot** to connect donors, underprivileged individuals, and businesses for secure and transparent contributions.
 - Integrated key features such as biometric authentication, e-vouchers, product verification, and employment support to enhance user experience and security.
 - Facilitated seamless transactions ensuring trust and accountability in the donation process through advanced verification mechanisms.
- My Portfolio Web Site**
Individual project | 2025 June
 - Developed a fully responsive and interactive website using **HTML, CSS, and JavaScript**, focusing on clean UI design, smooth animations, and optimized performance across devices. Implemented dynamic features to enhance user engagement and ensure cross-browser compatibility. ["Learn More"](#)
- Flight Seat/Ticket management system**
Individual project | 2025 April
 - Designed and implemented a flight seat and ticket management system using **Java**, enabling efficient booking, seat allocation, and ticket tracking. Focused on modular code structure, data validation, and smooth user interaction to ensure reliability and scalability.

CERTIFICATIONS

- **LinkedIn Learning**
Node.js Essential Training
 - 2025
 - Gained practical skills in Node.js for backend development. Covered module system, asynchronous programming, event-driven architecture, and building scalable applications.
- **LinkedIn Learning**
Learning the JavaScript Language
 - 2025
 - Developed a strong foundation in JavaScript, including syntax, DOM manipulation, events, functions, and object-oriented concepts. Applied knowledge to build interactive web applications.

- **LinkedIn Learning**
What is Generative AI
 - 2025
 - Learned the fundamentals of Generative AI, including AI concepts, generative AI tools, and real-world applications. Explored prompt engineering and how AI models create text, images, and other outputs.
 - **Codecademy**
Learn Java: Object-Oriented Programming Course
 - 2024
 - Mastered Java object-oriented programming principles, including classes, objects, inheritance, encapsulation, and polymorphism. Built Java applications with clean, reusable code structures.
- ["More"](#)

EDUCATION

- Bachelor of Computer Science: Second year**
Informatics Institute of Technology
09/2023 - present | Colombo, Sri Lanka
- Foundation of Computing**
Informatics Institute of Technology
07/2022 - 05/2023 | Colombo, Sri Lanka
- Ordinary Level**
Rahula College Matara
01/2011 - 05/2022 | Matara, Sri Lanka
